**Rated 4.9 stars on
AppSource**

'I love it. Zetadocs speeds up our accounts payable process, especially when we have invoices with multiple lines and pages.'

Apple Roofing / Zetadocs Capture

'We saw a 50% reduction in the time needed to submit monthly expenses.'

Headspring Executive Development
(formerly FTIECLA) / Zetadocs Expenses

'Each day we are saving at least 2 working hours with Zetadocs. This equates to 1 week in every month.'

Man & Machine Ltd / Zetadocs Delivery

ZetadocsCapture

Accelerate invoice processing

Zetadocs Capture provides AP automation that uses next generation, AI-driven document capture technology with automatic order matching and simple invoice approval. It also stores documents alongside Business Central transactions for instant access, cutting the time spent on manually rekeying data and finding related documents.

Key features

- Automated data entry and order matching for greater speed & accuracy
- AI-driven document capture, so no vendor templates or system training required to get started
- Documents stored centrally using SharePoint and easily retrieved via Business Central

ZetadocsDelivery

Send batches of documents automatically

Zetadocs Delivery makes the sending of batches of personalized documents from within Business Central much easier. This saves your finance team time in sending documents such as orders, invoices and payment reminders.

Key features

- Email consolidated batches of documents
- Automate the sending of documents, always personalized and consistent
- Can be customized, depending on your needs

ZetadocsExpenses

Make expense management a breeze

Mobile expense capture for travel and entertainment expenses, that integrates seamlessly with your finance and other user management systems. The Zetadocs Expenses app extracts data from receipts to create expenses automatically while on-the-go. Finance teams benefit from real-time visibility of spending and a streamlined expense management process.

Key features

- Rapid data extraction from receipts and bank feed transactions with no need to manually rekey data
- Expenses are automatically checked for policy compliance
- A secure, cloud-based solution available 24/7
- Seamlessly integrates with your existing systems
